

Cim KT57

WATER METER BOX FOR SIX LINES

A	Spheroidal cast iron trap Class C250 CIM KTC01B	
	external measurements	mm 468x483x60/30 h
	cover weight	14.0 kg
	frame weight	8.5 kg
	total weight	22.5 kg
B	Freeze protection pad CIM KTT01B	height 65 mm
C	Height adjuster CIM KTS01B	made of PUR
	available sizes	50-125 mm
D	Water-meter box CIM KT57P	bottomless
	internal measurements	mm 540x690x400 h
E	Base plate for water-meter box	open/closed bottom
	measurements	mm 580x730x25/10 h
F	Base for water-meter box CIM KTB57	open/closed bottom
	internal measurements	mm 525x675x150/135 h

This article was made in compliance with the quality management requirements of ISO 9001 standard. The integrated solutions for customer water connections are specifically designed to:

- create and develop solutions to provide efficiency and functionality of the service connections;
- eliminate the idea of the service connection as a "bothersome" appendage of the water network;
- create a rationale whereas meters and accessories are no longer installed in very dissimilar and difficult to access places;
- safely and efficiently attain excellent levels for reducing and containing water losses without investments;
- ensure an overall management of the water service that is increasingly oriented towards efficiency and effectiveness;
- increase the quality of the water balance by eliminating as many unnecessary components as possible. It is guaranteed for 5 years.
